O'Naturale Series

Hydrogen-Rich Reverse
Osmosis Water
Purification System

“ Hydrogen water has been studied in diverse patient populations and has shown positive effects on antioxidant status, immunity, and inflammation. ”

Benefits of Hydrogen-Rich Water

Higher Ph levels in the blood and feeling energized, including a sharpened thinking ability

Effective against free radicals – atoms caused by oxidative stress

Improve athletic performance by shortening the recovery time from physical exertion

Reduce inflammatory responses, improve blood flow to prompt healing

Anti-tumor properties & May be helpful in cancer treatment and therapy

Slow down aging process

What is Hydrogen Water?

Hydrogen water is regular drinking water infused with additional hydrogen molecules. Adding hydrogen molecules to water can cause effective absorption by penetrating the blood-brain barrier. It plays a beneficial role in diseases including metabolic syndrome, cancer, organ injury, and Parkinson's disease.

Oxidative Stress And Your Body

Oxidative stress is a condition that may occur when there are too many unstable molecules – *free radicals* in the body and not enough antioxidants to eliminate them. This can lead to cell and tissue damage.

Poor diet, smoking, exposure to environmental factors (e.g. toxins, air pollution, radiation, pesticides, sunlight) are some factors that may lead to oxidative stress. Long-term oxidative stress may play a role in aging and the development of chronic inflammation, cancer, and other diseases.

Drink Healthier. Hydrate Smarter.

Water Purification through Micro-Bubble Technology | O'Naturale

Real-time Micro-bubble technology. Water is electrolyzed to generate hydrogen molecules. The hydrogen molecules wrap the water evenly and encourages production of high concentration of hydrogen-rich water.

Reverse Osmosis Filtration Technology that filters impurities up to 0.0001 microns which includes sediments, bacteria, heavy metals, and even fluoride and other harmful substances in water.

Multi-Stage Filtration System that removes impurities, removes unpleasant odours and stabilises the PH level between 7.0 – 8.5 for consumption.

Stainless steel core for better hygiene maintenance.

Uses Integrated Waterway Plate starting from pipeline point to prevent water leakage and secondary pollutions.

3-seconds Rapid Heating Technology.

Description	O'Naturale Series
Filtration	PAC Composite Filter RO Membrane Carbon Rod Filter
Hydrogen Level	1418 ppb
UVC Sterilization & Self-Cleaning	Yes
Child Lock	Yes
Water Production Flow	30L/H
Water Heating Capacity	18L/H (≥90°C)
Instant Hot / Cold Water	Yes
Working Pressure	0.4 - 0.6MPa
Applicable Water Source	Municipal Tap Water
Ambient Temperature Operation	5°C - 38°C
Water Tank Capacity	2.5L / 6.0L
WiFi & App Enabled	Yes
Voltage	220V/50Hz
Power Consumption	0.1kW / 24H
Rated Power	2200W
Dimensions (L x W x H)	475 x 240 x 430mm
Net Weight	11.0kg
Warranty	1 Year

Recommended Replacement Cycle

PAC Composite Filter
6 - 12 months

RO Reverse Osmosis Membrane
12 - 24 months

Natural Micro-Mineralized Carbon Rod Filter
6 - 12 months

IMPORTANT NOTE

Filter replacement cycles are guidelines only and subject to water quality and usage.
